Full Stack Software Developer

(GLOBAL LOGISTICS)

Baltimore, MD 21230 (Locust Point, McHenry Row)

A chance to feel the excitement of a start-up combined with 105-years of history, plus learn an ever-changing industry that touches every aspect of our lives!

At Shapiro, our **Full Stack Software Developer** is responsible for coding, testing, debugging, and documenting new programs and changes to existing systems.

Join this 105-year-old customs broker and international freight forwarder as we transform our systems & leverage technology to stay dynamic, outperform our competitors, and to ultimately and most importantly … satisfy our customers (importers & exporters).

Our headquarters was named a Best Place to Work (again). Shapiro is not your grandpa's shipping company. We have a track record of transparency, developing employees, and investing in our environment like office space and now…work-from-home technology.

In a modern era where expertise is often devalued, Shapiro stands strong at 105-years old. We're so compliant that US Customs learns from us!

JOB DESCRIPTION

Responsibilities include:

- Develop and maintain modern user interfaces as described using design mockups. Requires skills using PHP, vanilla Javascript, React, VueJS, and CSS/SASS.
- Build PHP based RESTful APIs for internal and external applications.
- Provide support for legacy applications (Progress OpenEdge) while working with team members to migrate existing products to web-based platforms.
- Write stored procedures to maintain/manipulate MSSQL database transactions.
- Work with IT department in order to increase overall knowledge and efficiency.
- Submit programming and respond to concerns identified by Code Reviewers, Quality Assurance Specialists, and User Acceptance Teams.
- Utilize code comments to outline the intended purpose and parameters of classes and functions.
- Respond to Service Desk tickets in order to satisfy concerns of customers.
- Generate/write custom business reports on occasion using Progress OpenEdge and MSSQL.

SKILLS

- 3+ years working with SOAP or RESTful APIs. Experience with JSON, REST, and RAML is preferred.
- 3+ years working with Microsoft, IIS, MSSQL, PHP/Javascript code stack (Similar to LAMP code stack).
- 3+ years working with vanilla JavaScript. 2+ years working Git/version controls via (command line not required but preferred). 2+ years of experience working with Linux command line.
- Experience with Javascript libraries such as React or VueJS is a plus.
- Any experience working with PHP-based content management systems such as WordPress or Joomla.
- Experience working with PHP frameworks such as Laravel, Symfony, or CakePHP is a plus.
- Experience working Atlassian JIRA, Confluence, Bitbucket, or Bamboo is helpful.
- Experience writing unit tests and integration tests is helpful.
- Experience working and maintaining either Apache, Nginx, or IIS web servers is helpful. Experience with Great Plains is a plus.
- Professional behavior: Represents the company in a reputable, ethical, businesslike manner; complies with operating procedures and requirements.
- Ability to remain engaged and focused. Excellent written and verbal communication skills. Ability to generate creative solutions and/or problem-solve. Know the process and then think outside of the box.
- Must be resourceful, flexible, organized, detail-oriented, and team-oriented.
- Ability to effectively communicate with a variety of contacts, vendors, and departments required (internal and external customers).
- Reliable. Punctual. Organized. Discipline to implement and follow Standard Operating Procedures.
- Team player able to build trust and prove dependability.

EDUCATION AND EXPERIENCE

- High school diploma or equivalent, BS Computer Science or Information Systems preferred.
- 3+ years writing query statements and stored procedures for relational databases such as MySQL, PostgresSQL or MSSQL Server. Experience with MSSQL preferred.
- Strong internal customer service mindset required.
- 1+ years' experience with PC, including Microsoft Office, databases, software, web-based applications, and vendor's systems.
